SAVE RIVERSIDE PARK
NO PARK LAND FOR A SEWAGE PUMP STATION

We, the undersigned, call on our City, State and Federal officials to protect Riverside Park and not allow any additional park land to be used for a new sewage pump station. Riverside Park is an integral part of the Stockade Historic District and is a resource for everyone in Schenectady County and the Capital Region. The park land is irreplaceable and deserves protection.

We support the City's ongoing work to upgrade the City's wastewater treatment system but urge our elected officials to retrofit the existing pump station or build a new pump station OUTSIDE the Park.
